

Dear Sir/Madame

I would like to respectfully submit my opposition to the NAB's petition 04-160. Satellite radio is providing a great service in a free market. Artificial barriers should not be created by the existing monopolies which control normal radio. Please do not permit the NAB to try and determine whay it best for the consumer. I fell I am doign that by agreeing to pay for XM radio and the service it provides.

Thank you for your time.

Regards

Ronald K Stewart
